

Photo license terms

One document. The paid record selects Personal or Commercial.

01 Which terms apply

Your paid order confirmation or invoice identifies the buyer and photograph, states **Personal** or **Commercial** for each photograph, and records the price and payment date. Only that license section applies to that photograph; the Shared Conditions on page 2 always apply. A request, quote, or unpaid invoice does not grant use rights. The license starts after payment is confirmed and the full-resolution file is delivered.

02 Personal license

The individual buyer may keep the delivered file on devices they control, make reasonable backup copies, and make prints for their own private display. A printing service may receive the file solely to make those personal prints for the buyer. This permission has no fixed end date while the buyer follows these terms.

Personal restrictions

The buyer may not give away, resell, sublicense, or make the full-resolution file available for download; sell or distribute prints; post the photograph publicly, including on social media; or use it for a business, client, advertisement, product, publication, or public website. Any use beyond the personal uses above requires a separate Commercial approval and payment.

Commercial terms and conditions for both license types continue on page 2.

Commercial and shared terms

Commercial uses are approved and priced individually.

03 Commercial license

A Commercial buyer receives a non-exclusive, non-transferable license only for the use expressly described in the seller's approved written quote or paid invoice. That record must identify the photograph and buyer, permitted project or purpose, media or channels, territory, duration, and any quantity limits. The price is the approved amount in the paid record. If the approved use is unclear or incomplete, obtain written clarification before using the photograph.

How the approved use may be carried out

The buyer may resize or crop the photograph as reasonably needed for the approved use without materially changing its meaning. A contractor may handle the file solely to carry out that approved use for the buyer; the buyer remains responsible for the contractor's compliance. No other use is granted.

Uses needing express written approval

Unless the approved quote specifically allows it, the Commercial buyer may not resell or distribute the standalone file, offer it as a stock asset or template, sublicense it, use it on merchandise or product packaging, or use it outside the agreed channels, territory, term, or quantity. Additional uses require a new written quote and any additional payment.

04 Shared conditions

Neither license transfers copyright or gives exclusive rights. The buyer must keep the paid record with this PDF because together they identify the photograph and the rights purchased. A later change to the website does not change an already paid license. A specific exception written in the approved Commercial quote controls over a conflicting standard restriction for that transaction only.
